Faridabad, Haryana, India | +91 9703585629 | SATYASAI33M@GMAIL.COM | [linkedin.com/in/satya-sai-medicherla-a23601381](https://www.linkedin.com/in/satya-sai-medicherla-a23601381) | github.com/satyasaimedicherla-lang

SUMMARY

Computer Science undergraduate specializing in Cyber Security & Threat Intelligence, with a strong foundation in Data Structures & Algorithms, Python and C++. Experienced in applied cyber security through an industrial internship and hands-on machine learning project work. Quick learner, comfortable working across security, systems and software problems, seeking a Software Engineering role to apply strong problem-solving and engineering fundamentals.

TECHNICAL SKILLS

- **Languages:** Python, C++
- **Core CS:** Data Structures & Algorithms, Operating Systems, Networking fundamentals
- **Security:** Network Security, Cyber Security, Threat Intelligence, Linux Administration
- **Tools / Libraries:** Scikit-Learn, Git/GitHub

EDUCATION

Manav Rachna University, Faridabad Expected Graduation: 2028
B.Tech in Computer Science, Specialization in Cyber Security & Threat Intelligence
CGPA: 7.54 / 10

Intermediate (MPC) Sri Chaitanya College | 2022 - 2024 | Board: APBIE
Performance: 90.1 Percentile.

Secondary School Certificate (10th Class) Sri Chaitanya School | 2021 - 2022 | Board: APBSE
Performance: 92.6 Percentile.

EXPERIENCE

Cyber Security Intern | *Plasmid Innovation Ltd* Feb 2025 - Apr 2025

- Completed industrial training focused on applied cyber security practices; delivered work on live industrial projects.
- Received a formal letter of recommendation for quality of work and diligence.

Brochure Designing Project | *Infosys Springboard* Feb 2025

- Completed a short design project on visual communication and layout strategy using Canva.

CERTIFICATIONS

- **Information Security** - Quick Heal Academy (2026): information security principles, data protection, threat mitigation.
- **Linux Proficiency** - Quick Heal Academy (2026): OS fundamentals and command-line administration.
- **Network Support & Security** - Cisco Academy (2025): troubleshooting, endpoint security, secure access configuration.
- **Data Structures & Algorithms** - LinkedIn Learning (2025): efficient data organization and computational optimization.
- **Programming Using C++** - Infosys Springboard (2025): OOP concepts, memory management, application logic.

PROJECTS

Credit Card Fraud Detection | *Personal Project*

- Built a binary classification model to detect fraudulent transactions on the Kaggle European Cardholder dataset, handling extreme class imbalance (0.17% fraud rate).
- Applied SMOTE for synthetic minority over-sampling and RobustScaler/PCA for feature preprocessing.
- Compared Logistic Regression and Random Forest classifiers, evaluated using PR-AUC and F1-Score rather than accuracy, given the imbalanced dataset.
- Stack: Python, Scikit-Learn, PCA, RobustScaler.

Tor Project | *Plasmid Training*

- Deep Dive into TOR Architecture: Conducted an in-depth analysis of how TOR routes traffic through multiple relays (Entry, Middle, and Exit nodes) to ensure user anonymity and privacy.
- Network Traffic Analysis: Utilized Wireshark to intercept and study encrypted TOR communication.
- Patterns, identifying how data is packetized and anonymized over the network.
- Outcome: Gained a deep understanding of onion routing and privacy-focused network architectures.
